DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over 4,804,346 to Sheng in view of 5,613,890 to DeMars. Sheng discloses most elements of the claim including having a housing (1) a dipping chamber associated with the housing (lower portion of mouth, see figure 2); a bottle of bubble solution (5), a tube coupling the source of bubble solution with the dipping chamber (17). Sheng does not however disclose a feedback channel that fluidly couples the dipping chamber and bottle interior. DeMars provides a teaching of having a feedback channel (140) that allows assess bubble solution to drain back into the bottle and a means for blocking the feedback channel (144). In lieu of this teaching it would have been obvious to one having ordinary skill in the art at the time the invention was made to use a feedback channel with the dipping chamber of Sheng to provide for access fluid to drain from the lip surface 3a (as shown in figure 2) back into the bottle.

Allowable Subject Matter

Claims 1-4, 7-9, 11-20 are allowed over the prior art of record.

Art Unit: 3722
